## Smart Education Management

*"Transforming Education with AI"*

Disane Technologies

### About Us

EduTrack AI Software is a product of Disane Technologies, created to transform education in South Africa. We provide schools with a smart education management platform powered by AI, enabling real-time tracking of learner performance, attendance, and progress. Our mission is to improve learning outcomes, empower teachers, and support parents with meaningful insights.

**Mission:** To drive digital transformation in education through AI-powered tools.

**Vision:** Every learner in South Africa connected, supported, and empowered.

## Our Solution

EduTrack AI Software offers schools an affordable and scalable system for managing learners' academic journey. Features include attendance monitoring, learner performance analytics, parent-teacher communication, and school-wide reporting dashboards.

■ Feature	■ Benefit
Attendance Tracking	Instant monitoring of learners' daily attendance
Performance Analytics	Identify learners at risk early with AI insights
Parent Communication	Keep parents updated via real-time reports
Affordable Pricing	Village Schools: R80 per learner/year Urban Schools: R200 per learner/year

## Our Impact

EduTrack AI Software is designed to create measurable impact in schools by improving accountability, reducing administrative workload, and enabling learners to reach their full potential. Our goal is to connect village and urban schools under one affordable, AI-driven education management platform.
